# Welcome to Helapet

In this, our 40<sup>th</sup> year of trading we would like to welcome you to our 2024/25 catalogue.

Since 1984 we have steadily increased our product offering to both the UK and overseas markets, growing from our initial disc filter products to a comprehensive range of cleanroom consumables, drug preparation devices, cold chain solutions and a more extensive range of custom-made filters than in the early days. This new catalogue also sees additions to our offering including our new Arisure<sup>®</sup> Closed System Transfer Devices on pages 26-27, new ranges of Swabable Vial Adapters and Spikes on pages 28-29 and an extended nitrile glove range on page 13. Further additions to the range will be added to our website [helapet.co.uk](http://helapet.co.uk) over the coming months.

As we celebrate our 40<sup>th</sup> year we recognise that this would not have been possible without the support of you, our loyal customers, who have worked with us in developing our business to meet the needs of an ever-changing market. Your opinion matters to us, be that on our existing products and services, potential new requirements you may have or how we can continuously improve the services we provide.

We would like to invite you to take our “Voice of the Customer” short survey and let us know what you think of us and how we can better fulfil your requirements. You can do this by visiting our website or alternatively by speaking to our sales and marketing team based at our Lister House head office, or your local Account Manager.

Thank you for your loyalty and support and we look forward to working with you in the coming years.

**Tony Phelps**, Managing Director

## About Us

Established in 1984, Helapet is one of the leading UK suppliers of medical and cleanroom consumables and inline disc filtration devices. Our safety consumables are designed to protect operators and equipment from the risk of contamination, supporting critical environment activities in aseptic production, pharmaceutical manufacture and scientific research.

Dedicated to our vision as the “*partner of choice in creating a safe and clean environment*”, we are proud to be a trusted supplier to the National Health Service (NHS) and cleanroom technology organisations across the globe. In 2002 we became a member of the prestigious CliniMed<sup>®</sup> Group of companies, committed to serving healthcare markets under high standards of ethical and professional practice.

Helapet takes pride in putting our customers at the core of everything we do and invests in developing and maintaining long term client relationships. Our experienced account management team provide on-site training, support and guidance to help clients identify the most cost effective and reliable solutions for their individual needs.

In-house administration and technical staff deliver a comprehensive back-up service to help resolve all types of customer enquiries in a timely and professional manner.

Our unwavering customer commitment inspires our continuous improvement strategy, evaluating feedback and integrating best practices into our daily activities. Helapet staff utilise lean methodologies to consistently review our production quality control systems and supply chain to meet customer expectations, reduce lead times and deliver best value for money. An accredited ISO 13485:2016 company, Helapet are also proud holders of Investors in People (Gold) accreditation, recognising the value we place on people development.

On behalf of the Helapet team, we thank you for the interest you have shown in our catalogue and our business. We invite you to contact us and let us help you discover more about how our products and services can be of benefit to you.

We thank Laura, part of our cleanroom operative team for being the front cover model in this edition of the Helapet Product Catalogue.

“ **Always found Helapet to be extremely efficient and helpful**”

District General Hospital

# Putting the customer first

At **Helapet** we pride our success and growth on our ability to put the customer first.

By placing our customer at the centre of our brand, we continually seek to understand their wants and needs, enabling us to provide the best customer experience and inform our next generation of products and services.

We have adopted a highly customer-centric culture where all Helapet staff are trained and empowered to improve how we do things for the ultimate benefit of our clients.

## How do we do this?

---

# Our carbon reduction strategy

We are passionate, committed and actively engaging in several initiatives to reduce our carbon footprint.

It is the responsibility of this generation to implement a sustainable framework for the future. We continuously review all areas of our business processes and implement initiatives to further our contribution towards climate control.

## Steps we are taking...

### Product Packaging

- ✓ Introduced bubble Wrap with 55% recycled content
- ✓ 100% recyclable adhesive paper tape replacing plastic tape
- ✓ Use pallet wrap film with 55% recycled content

### Energy Efficiency Improvements

- ✓ Passive Infrared Sensors (PIRs) fitted in some areas of the building
- ✓ Installation of new cleanroom air handling units which are more energy efficient

### Our Partners

- ✓ We choose to work with environmentally responsible partners who endeavour to reduce their environmental impact
- ✓ Our courier service guarantee that every parcel they deliver is carbon neutral
- ✓ We choose our energy supplier because they help to achieve commercial and sustainability goals through their own renewable source electricity

### New Initiatives

- ✓ We sourced Eco Sharps Bins containing at least 40% recycled materials (see page 38)
- ✓ We survey and assess each of our employees' journey to and from work, redressing our energy use to be as efficient as possible
- ✓ We adopted Ecosia as our primary search engine. Ecosia plants a tree for roughly every 45 online searches, helping to reduce the impact of climate change

### Future Plans

- ✓ We will continue to explore and expand our use of renewable energy sources
- ✓ Voltage optimisation

***This is the best time to push forward,  
we continue to push for improvement.”***

**Tony Phelps, Managing Director**

# Cleaning and Disinfection

## SteriClean® FloWrap Wipes

SteriClean® FloWrap Wipes

### SteriClean® FloWrap Wipes

SteriClean® FloWrap Alcohol Wipes are the perfect solution for general purpose cleaning in a cleanroom environment. Incorporates strong, low linting wipes impregnated with SteriClean® high performance 70% IPA or IMS alcohol solution blended with Water for Injection (WFI). Resealable bag packaging and two convenient pack size options make SteriClean® FloWrap Wipes an excellent alternative to tub wipes.

- Absorbent polyester/cellulose blend
- IMS or BPR\* compliant isopropyl alcohol (IPA)
- Excellent durability, wickability and cleanliness
- Resealable poly-pouch to prevent drying out
- "Z" folded for individual dispensing
- Double poly-bagged for ease of transfer

## SteriClean® Dry Wipes

SteriClean® Dry Wipes

### SteriClean® Dry Wipes

SteriClean® Dry Wipes are manufactured from high performance polyester/cellulose bonded fibres. Packed in alcohol resistant packaging and irradiated to not less than 25 kGy makes them an ideal choice for any ISO grade cleanrooms. Supplied ready folded in several packaging configurations, ranging from individually packaged to economic multi-packs.

- Durable 68gsm polyester / cellulose blend
- Low linting with low extractables
- Cleanroom processed
- Packed in alcohol resistant paper-free packaging
- Sterile and non sterile presentations

# Latex Gloves

Latex Gloves

## Berner Cytotoxic Latex Glove

Berner Cytotoxic Latex Gloves stand out due to their exceptional elasticity, high wearable comfort and protective properties against cytotoxics, chemicals and biological agents. Double dipped for extra strength, delivering exceptional protection without the need for double gloving.

- Purpose designed for handling cytotoxics
- Over 8 hours of chemical permeation resistance\*
- Fully textured for good grip of products
- Ready folded in non-particulating polypackaging
- 300mm beaded cuff for secure protection above the wrist
- Permeation tested with numerous chemicals in accordance with EN374-3 and EN16523-1

Additional grip on the fingertips and palm

## Foot Protection

Foot Protection

### Helapet Standard Overshoes

Manufactured from soft, microporous fabric resistant to chemical splashes and dust. Elasticated opening allows for secure fit and wearability.

- Highly resistant Cat III Type 5 and 6 material
- Robust, low linting material
- Anti Static – EN1149-5: 2008
- Secure and comfortable fit

**AO700CS**

410mm (16") • non sterile • 20 x 10 pairs/pck

[Datasheet](#)

### Safestep Non-Slip Overshoes

Robust protection against footborne contamination with slip-resistance to prevent accidental falls.

- Low linting materials
- Compatibility with ISO Class 5 environment
- Anti-slip sole for added grip
- Elasticated ankle cuff to fit different types of footwear

**AO0016**

406mm (16") • non sterile • 4 x 100 pcs/pck

[Datasheet](#)

### Helapet Non-Slip Overshoes

Helapet overshoes now offer a nylon coated non-slip sole for additional grip on smooth floors and wet surfaces.

- Assured stability on smooth surfaces
- Chemical resistant Cat III Type 5 and 6 material
- Non linting and anti-static
- Elasticated finish for secure and comfortable fit

**AO702CS**

410mm (16") • non sterile • 20 x 10 pairs/pck

[Datasheet](#)

### Polyethylene Overshoes

Easily donnable and removable footwear, able to withstand liquid splashes and dry particles.

- Secured over different type of footwear
- Resistant to a wide range of chemicals
- Facilitates grip on smooth cleanroom floors
- Low linting material

**AO2401**

360mm (14") • non sterile • 10 x 100 pcs/pck

[Datasheet](#)

### Tyvek® Overboots

Disposable and lightweight, Tyvek® Overboots provide safe lower leg protection.

- Secure wrap around tie fastening
- Anti-slip sole for enhanced grip
- Lightweight, low linting material

#### AT0010

non sterile • 10 x 10 pairs/pck

Datasheet

### Chemsplash® Elasticated Non-Slip Overboots

Designed from low-linting, chemically resistant Type 5 and 6 material, granting a secure fit over standard footwear with a slip retardant sole for extra grip on smooth surfaces.

- Comfortable and chemically resistant
- Anti-slip, clear PVC sole preventing accidental slips
- Secure elasticated opening at the top and ankle for snug fit over standard footwear
- Anti-static and non-linting for assured use within cleanroom environments

#### AO2565

# Syringes, Venting and Transfer Devices

## Arisure® Closed System Transfer Devices (CSTD)

Arisure® Closed System Transfer Devices (CSTD)

# ARISURE®

Arisure® is a safe, needle-free solution for preventing the risk of drug and user contamination, by maintaining the closed transfer of medicines from preparation to administration.

Comprehensive protection for the practitioner, the drug and the patient.

Arisure® consists of 3 simple-to-use components, working together to prevent contamination of the solution, whilst protecting the healthcare professional from exposure to harmful aerosols and droplets.

Using standard luer connections, Arisure® Closed System Transfer Devices can be quickly integrated in standard work processes, improving safety, speed and efficiency.

### Arisure® Closed Vial Adapter

The Arisure® CVA is completely closed, helping to reduce the risk of exposure to hazardous drugs while providing a safe and simple solution for drug reconstitution and transfer.

- Mechanically and microbiologically closed to prevent the escape of harmful vapor and aerosols into the environment\*
- Dry disconnection reduces exposure to harmful drug residue
- Maintains drug vial sterility for up to 7 days\*
- 13mm and 20mm vial size options available

#### IV0051

Arisure® Closed Vial Adapter • 13mm • sterile • 50 pcs/pck

#### IV0053

Arisure® Closed Vial Adapter • 20mm • sterile • 50 pcs/pck

## Arisure® Closed System Transfer Devices (CSTD)

Arisure® Closed System Transfer Devices (CSTD)

### Arisure® Closed Male Luer

Forms a secure, dry disconnection with any Arisure® needle-free valve. Once disconnected it remains closed stopping solution from leaking through, preventing accidental spills or discharge of hazardous drugs.

- Safe, dry disconnection reducing exposure to harmful drug residue
- Mechanically closed when not accessed, preventing accidental leaks or spills
- Microbiologically closed, reducing the risk of contamination
- Maintains seal integrity even when accessed multiple times

#### IV0058

Arisure® Closed Male Luer • sterile • 100 pcs/pck

Datasheet

### Arisure® Dry Spike

Provides an easy, needle-free method of transferring fluid into an IV bag whilst maintaining a closed system.

- Simple, secure attachment to an IV bag
- Forms safe, dry disconnect when used with Arisure® CML reducing risk of harmful drug contamination
- Independent lumens for both drug admixture and IV access for patient delivery
- High flow rate for easy transfer of viscous solutions

#### IV0050

Arisure® Dry Spike • sterile • 50 pcs/pck

## Swabable Needle-free Devices

Swabable Needle-free Devices

### Swabable Vial Adapters

Granting needle-free and drip-free aspiration of solutions from vials, bottles and other containers, the integrated Arisure® Neutral Valve provides a microbiologically closed membrane connection to prevent the risk of accidental leaks and spills.

- Needle-free aspiration of drugs and other solutions
- Microbiologically closed luer connection for assured product protection
- Reduced risk of contamination from hazardous residues
- Low attachment force with novel skirt design

#### IV0033

13mm • sterile • 100 pcs/pck

#### IV0034

20mm • sterile • 100 pcs/pck

Datasheet

### Swabable Vented Vial Adapter

Featuring a 0.2 micron vent filter to minimise aerosol contamination, Swabable Vented Vial Adapters are ideal for needle-free drug preparation of cytotoxics. The integrated Arisure® Neutral Valve grants easy and secure aspiration whilst maintaining a closed system.

- Safe, needle-free vented aspiration
- Microbiologically closed connection maintains drug vial sterility for up to 7 days\*
- Secure membrane luer connection prevents leakage
- Low attachment force with novel skirt design

#### IV0036

13mm • sterile • 100 pcs/pck

## Swabable Needle-free Devices

### NeutraClear™ Needle-free Connector

Small, compact with a reverse split septum, providing a closed system and microbiological barrier to help reduce contamination. Due to its low priming volume, this device is suitable for paediatric use.

- Swabable smooth surface
- Dry disconnect reducing risk of drip contamination
- Fully transparent for clear view of any residual fluids
- Neutral displacement minimising risk of occlusion and infections

#### IV0200

sterile • 200 pcs/pck

Datasheet

### Vented Spike w/ NeutraClear™ Valve

Ideal for needle-free withdrawal of cytotoxic and other hazardous drugs from 20mm vials, the integrated NeutraClear™ bi-directional valve provides a low priming volume making this device suitable for paediatric doses.

- Secure vial attachment
- Safe, needle-free penetration
- 0.2µm vent filter for sterile venting applications
- Swabable NeutraClear™ valve for precise aspiration of small doses
- Spike cap reducing risk of touch contamination

#### IV0509

sterile • 40 pcs/pck

Datasheet

### Vented Spike w/ C-Flow Connector

Ideal for needle-free withdrawal of cytotoxic and other hazardous drugs from 20mm vials, the integrated C-Flow bidirectional connector provides easy aspiration of viscous solutions.

- Secure vial attachment
- Safe, needle-free penetration
- 0.2µm vent filter for sterile venting applications
- Swabable surface for easy disinfection
- Spike cap to reduce risk of touch contamination

#### IV0509B

sterile • 40 pcs/pck

Datasheet

# Syringes, Venting and Transfer Devices

## Needle-Free Venting Devices

Needle-Free Venting Devices

### Vented Vial Adapter

Safe, needle-free solution for the reconstitution of cytotoxics, antibiotics and other hazardous chemicals.

- Safe transfer with minimal drug residue left in the vial
- Plastic spike for needle-free reconstitution
- Easy snap-on attachment
- Integrated grip reducing luer contact

**IV0013**

13mm • sterile • 100 pcs/pck

**IV0020L**

20mm • sterile • 100 pcs/pck

[Datasheet](#)

### PharmaVent™ Spike Vent

Vented, needle-free access to medical and pharmaceutical solutions in different bottle or vial sizes.

- 0.2 µm vent filter to minimise risk of aerosol contamination
- Needle-free anti-coring plastic spike
- Secure luer lock connection for syringe attachment
- Polypropylene protective cap

**IV4040**

sterile • 2 x 50 pcs/pck

[Datasheet](#)

# Syringes, Venting and Transfer Devices

## Venting Devices - Cannula

### PharmaVent™ Needle Vent

Simple-to-use venting device with an integrated 18mm diameter PTFE filter enabling pressure equalisation in vials.

- Integral 0.2 µm vent filter reduces risk of aerosol contamination
- Excellent air flow rate
- Anti-coring tip
- Suitable for all vial sizes

**IV7471**

18mm • sterile • 2 x 50 pcs/pck

**Datasheet**

### Rowespike® II Chemo Vent and Filter

All-in-one dual purpose air vent and particulate filtration, granting enhanced user protection during sterile preparation of drugs including cytotoxic solutions.

- 5 µm particle filtration of solutions
- 0.1 µm filter for precise venting
- Easy-to-use ergonomic design
- Safety flip cap to protect luer connection
- Compatible with cytotoxic substances

**IV6016**

sterile • 3 x 50 pcs/pck

**Datasheet**

### Rowespike® Vent

Safety capped sterile venting device, ideal for vented reconstitution of cytotoxics and other hazardous solutions.

- 0.1 µm filter for precise venting
- Safety flip cap to protect luer connection
- Easy-to-use ergonomic design
- Compatible with cytotoxic substances

**IV6017**

sterile • 3 x 50 pcs/pck

**Datasheet**

# Syringes, Venting and Transfer Devices

## Luer Lock Connector / Syringe Caps

Luer Lock Connector

### Guarded Female Luer Lock Connector

The Guarded Female Luer Lock Connector can be securely applied to luer lock syringes or other luer lock devices to facilitate transfer or mixing of fluids or connecting various IV sets. The large finger grips help to protect against touch contamination during both pack opening and throughout the performance of procedures.

Manufactured from polypropylene the connectors are both latex and pyrogen free and are supplied individually sterile blister packed for economic use.

- Rapid contaminant-free transfer
- Large finger grips facilitating aseptic technique
- Secure double-ended female luer lock connections
- Non-toxic and non-pyrogenic
- CE-marked

Datasheet

**IV57400**

23mm • sterile • 100 pcs/pck

Syringe Caps

### Combi-Cap® Luer Lock Syringe Cap

Secure and versatile method of closing syringes, catheters and open-ended IV devices. Helapet Combi-Cap's are microbiologically and structurally integrity tested with our PharmaPack® sterile BD luer lock syringes\*.

- Male and female luer lock connection
- Allows alcohol disinfection with no leaching
- Non-toxic and non-pyrogenic
- Sterile and individually blister packed

**IV2102**

sterile • 1,000 pcs/pck

Datasheet

### Tamper Evident IV Syringe Cap

Designed to reduce the risk of medications being compromised once they have left the custody of the pharmacy, providing a simple to use method of securing syringes during transit. Helapet Tamper Evident IV Syringe Cap's are microbiologically and structurally integrity tested with our PharmaPack® sterile BD luer lock syringes.\*

- Secure luer lock connection
- Maintains syringe integrity
- Transparent outer sleeve
- Simple non-touch removal
- Latex free, non-pyrogenic
- CE marked

**IV5750R**

## Blunt Fill Aspirator Needles / Syringe Filters / Syringe Transporter

### Blunt Fill Aspirator Needles

Ideal for the precise withdrawal and introduction of fluids into deep well containers and vials, the blunt 16-gauge cannula prevents unnecessary needle-stick injury during use.

- Ideal for use with ampoules, vials and bottles
- Reduced risk of needlestick injury
- Easy penetration of vial stoppers
- Two convenient cannula lengths

#### IV3234

### Helapet Pre-filled Syringe Transporter

A versatile and robust barrier solution for the transit of pre-filled syringes, the Helapet Pre-filled Syringe Transporter provides strong protection against impacts and effective containment of solutions in case of possible syringe discharge.

- Transparent plastic housing
- Can be heat sealed for additional security
- Secure containment of accidental leakages
- Accommodates 1ml-5ml or 30ml-50ml syringe sizes
- Available sterile for cleanroom use

## PharmaPack® Syringes

PharmaPack® Syringes

## PharmaPack® sterile multi-pack syringes

Helapet offer a comprehensive range of PharmaPack® sterile bulk-packed luer lock and luer slip syringes in different bag configurations, suitable for high volume aseptic manufacturing units. PharmaPack® multi-pack syringes provide a quick, efficient and cost effective solution when transferring several syringes into a cleanroom environment, saving the user precious time and expense.

- CE marked syringes
- Metric graduation
- Transparent, low lint packaging
- Suitable for Grade A environments
- Seal integrity tested
- Produced to ISO 13485:2016 standard
- Microbiologically and structural integrity tested in accordance with NHS protocols\*

Datasheet

### Giving you more...

Helapet offer our quality range of sterile multi-pack syringes with a host of custom features to further enhance the efficient transfer and use of syringes in controlled preparation areas.

#### Capped

Optional capping of tips to reduce risk of contamination during removal from the packaging.

#### Luer Lock / Luer Slip Connection

Standard connections used for administration or mating with other medical devices and instruments.

#### Size

A comprehensive range of syringe sizes available include:  
1ml, 3ml, 5ml, 10ml, 20ml, 30ml, 50ml

#### Pack Volumes

Economic pack quantities of 5, 10, 25 or 50 syringes to suit individual production runs.

#### Double or Triple Bagged Packaging

Select number of sterile barriers to best match the specific requirements of your transfer process. Our syringe packs use clear, alcohol impermeable packaging.

Plain Bags

### UV Light Inhibiting Amber Bags

Helapet amber bags are fully certified to Pharmacopoeia standards, restricting the amount of observed light passing through the bag and not exceeding 10% threshold at any wavelength in the range of 290nm to 450nm.

- High quality UV protection during transfer or storage of photosensitive products
- Multiple size options
- Open-ended, sealable and resealable
- Strong 250 gauge / 62 micron polyethylene material

Datasheet

\*minimum order quantity of 20 packs

*\*All Helapet amber bags conform to US Pharmacopoeia performance testing standards for light transmission (661 and 671), not exceeding 10% threshold at any wavelength in the UV range of 290nm to 450nm.*

### Isolator Waste Bag

Designed to fit onto the waste port of an isolator, Helapet Isolator Waste Bags allow the removal of accumulated non-sharps waste.

- Can accommodate high volumes of non-sharps waste
- Convenient waste removal without compromising sterility of the isolator
- Strong 250 gauge / 62 micron polyethylene material
- Individually polybagged and sterilised for efficient cleanroom transfer

**XX1538**  
W381 x L965mm • sterile • 10 x 10 pcs/pck

## Eco Sterile Sharps Bins

Eco Sterile Sharps Bins

### Eco Sterile Sharps Bins

Manufactured to facilitate the safe and efficient disposal of sharps, each container is produced using **up to 46% recycled material** to minimise impact on the environment. Our sharps bins are individually double or triple bagged and sterilised by gamma radiation, facilitating safe and rapid transfer into high grade cleanroom and isolator environments.

- Safe disposal of sharps in cleanrooms and isolators
- Reduced environmental impact and carbon footprint
- Colour coded tops for medicinal products and cytotoxic waste
- Pre-cleaned avoiding lengthy disinfection procedures
- Sterile double or triple-bagged for immediate cleanroom transfer
- Numerous capacity sizes to suit individual usage requirements

## Spill Kits

Spill Kits

### Berner Cytotoxic Spill Kit

Designed specifically for handling cytotoxic drugs, each kit provides the user with a selection of necessary aids in the clean-up and disposal of hazardous liquid spills.

- Easy-to-use solution for handling wet cytotoxic spills
- Contains essential PPE and cleaning tools conveniently packed in order of use
- Compact packaging for easy storage and transport
- Enclosed accident report form
- Convenient gown and glove size options

Datasheet

# Clinical Waste and Spillage

## Spill Control Products and Absorbent Workmats

Spill Control Products

### Berner ChemoSorb Pads

Placed over hazardous spills, the absorbent material converts liquids into a gel substance for safe and easy disposal.

- Assured absorption of up to 3L of liquid
- Compatible with cytotoxic drugs
- Low linting to reduce contamination risk
- Latex free to prevent allergic reactions

**CS120016**  
38cm x 54cm  
non sterile • 10 pcs/pck

Datasheet

### HazMat Chemical Absorbent Pillows

Highly absorbent and designed to soak up large quantities of aggressive chemical drips, leaks and spills before they migrate.

- Safe absorption of acids, caustics and unknown liquids
- Won't degrade or cause a dangerous reaction upon contact with corrosive spills
- High capacity to quickly soak up liquids during spill response
- Polypropylene skin resists chemicals and holds in liquid, even when saturated

Datasheet

**CS7306**  
20 x 20cm • non sterile • 10 pcs/pck

**CS7307**  
20 x 43cm • non sterile • 10 pcs/pck

**CS7015**  
43 x 41cm • non sterile • 10 pcs/pck

### Polypropylene Containment Socks

High absorbency of large quantities of aggressive liquids, each sock offers essential containment by easily shaping around the spill.

- Low linting materials
- Can circle spills preventing migration
- Suitable for soaking chemical spills
- Rolled in heat sealed polybags for added cleanliness

**CS2004**  
8 x 117cm  
non sterile • 12 pcs/pck

Datasheet

Absorbent Workmats

### Berner Cytotoxic Workmat

Ideal for the safe absorption of cytotoxic agents in controlled work environments and as general drip and spill protection.

- Proven 3 layer protective system
- Safe absorption and containment of cytotoxic drugs
- Non-slip backing for added stability on smooth work surfaces
- Individually packaged and sterilised for optimal use in cleanroom environments
- Low linting to reduce risk of contamination

**WP8001**  
26 x 42cm • sterile • 50 pcs/pck

**WP8101**

## Sterile Marker Pens / Cleanroom Paper

Sterile Marker Pens

Cleanroom Paper

### Sterile Sharpie Marker Pens triple-bagged

Fine-tip black marker pens which have been cleanroom triple-bagged and terminally sterilised for efficient and swift transfer into cleanrooms, isolators and aseptic environments.

- Permanent writing on most types of surfaces
- Quick drying, non-toxic black ink
- Fine tip for precise writing
- Low-linting, sterile triple-bagged polypackaging supporting aseptic transfer procedures

**XXTB510BLK**

triple-bagged • sterile • 5 x 10 pcs

# Inline Disc Filters

## Vari-Disk® Custom Design Service

Helapet custom manufacture disposable in-line disc filters, used for the vital protection of sensitive instrumentation from the risk of particulates, moisture and micro-contamination.

Each filter is produced in an ISO Class 8 rated cleanroom, combining a variety of filter media contained in a circular polymer housing with a selection of inlet/outlet connectors.

Compact, low linting and clean, our filters are used for a variety of equipment protection applications including gas venting, liquid clarification and particle filtration. Our Tampro print technology allows clients to add branding or information directly onto the filter in a range of colours.

Vari-Disk® Service

- ✓ Can be fitted inline onto a variety of devices and instrumentation
- ✓ Precisely designed to exact specifications and tolerances
- ✓ Compact and lightweight for neat fitting inside equipment
- ✓ Cleanroom manufactured to reduce risk of contamination
- ✓ Low production volumes at competitive prices
- ✓ Complete traceability and certification

Brochure

## Design your own filter in 5 easy steps

We take pride in providing our customers with their ideal filter solution, first time. To do this we have created an easy online tool to design your filter and provide an easy guide to the design process below.

1

### Choose your Filter Size

The effective filtration area of the media should be enough to process the sample without affecting the desired flow rate. Choose from three different sizes of filter and effective filtration area.

2

### Select Inlet/Outlet Connectors

Helapet provide an extensive range of connectors for the inlet and outlet sides of each filter, available in the right combination to meet your specifications.

3

### Select the Right Media

Filter media is critical to your application. Choose the materials for its inherent properties: such as hydrophilic/phobic, pore strength, chemical compatibility and thermal stability.

4

### Custom Print your Filter

Our OEM service offers the option to brand your filter with company logo or part numbers directly onto your filter on either the inlet or outlet sides, in a range of ink colours.

5

### Testing and Packaging Services

We offer testing, packaging and sterilisation services, which reduces time, improves convenience and provides added assurance.

### Test methods we offer to validate filter performance

- ✓ Bubble point / alcohol
- ✓ Media integrity
- ✓ Burst
- ✓ Housing integrity
- ✓ Air / liquid flow rate
- ✓ WEP

## Client services include:

### In-process consultancy

We pride ourselves on offering a consultancy based manufacturing service, working closely with our clients and using CAD software to create accurate filter designs

### Sampling

We can produce prototype samples of each new filter product for you to test before proceeding to manufacture

### Sterilisation

Our expert knowledge means we can supply our filters non-sterile or sterilised by Ethylene Oxide (ETO)

*We found Helapet very easy to work with, the understanding of our filter requirements and technical knowledge have ensured we got the right product to suit our needs.*

Autoclave Manufacturer

# Inline Disc Filters

## Common Applications

Common Applications

### Autoclave Disc Filters

- 0.3µm HEPA media
- High performance particulate removal to 99.97%
- Ultrasonically welded media to prevent bypass
- Allows transfer of air for bi-directional flow

### Pipette Controller Disc Filters

- High particle retention
- Hydrophobic PTFE media
- Avoid contamination in critical applications
- Customisable to specific filtration requirements

### Vacuum Pump Disc Filters

- Hydrophobic PTFE membrane
- Helps protect the instrument from particulate contamination and moisture damage
- Easy to apply and remove from tubing
- Customisable to specific filtration requirements

### CO<sub>2</sub> Incubator Disc Filters

- Hydrophobic rated filters, ideal for retention of moisture in air
- Protects CO<sub>2</sub> incubators from contamination and moisture damage
- Customisable to specific filtration requirements

### Gas Analyser Filters

- PTFE rated at 99.9999% particle retention
- Ensuring safety of sensitive electronics whilst maximising flow rates
- Ideal as a last chance filter for protecting moisture sensitive equipment
- Customisable to specific filtration requirements

### Ink Jet Disc Filters

- Allows even distribution of ink ensuring high quality finish whilst protecting against particulate contamination
- Tested to withstand up to 50psi, allowing positioning on high pressure lines
- Available 1µm to 100µm sizes
- Customisable to specific filtration requirements

## Standard Filters

Our standard parts contain our most requested combinations to suit a wide range of applications.

Product Code	Size	Media	Inlet	Outlet	Sales Unit
FH4235	24mm	0.2µm PTFE	Male Luer Slip	Male Luer Slip	50 pcs/pck

*Really positive,  
no problems at all*

Head Veterinary Nurse – Vet Treatment Centre

*I always think that the personal  
touch is always evident when  
I contact both the rep and  
customer service*

Section Head Microbiology – NHS Laboratory

*Products are of a good  
quality and delivery is fast.  
Ordering samples is easy too*

Lead Technician - NHS Trust

*The customer service  
from Helapet is amazing*

Pharmacist - NHS Foundation Trust

*I was very impressed with  
the way Helapet conduct  
their business and treat  
their customers*

Sales Manager – Filtration Manufacturer and Distributor
