

SteriClean®

Alcohol Sprays

High performance general purpose disinfectant sprays for use in cleanrooms and critically controlled environments. SteriClean® Alcohol Sprays use an optimal mix of 70% v/v isopropyl alcohol (IPA) or de-natured ethanol (DE), blended with 30% water for injection (WFI) and 0.2 micron filtered for use in aseptic areas.

Contained in an ergonomic and lightweight bottle, each spray uses a proven closed bag in bottle spray assembly to maintain sterility of contents by restricting the ingress of bacteria*. 0.45L trigger sprays are ideal for accessible cleaning in confined work areas. Each SteriClean® Alcohol Spray is double or triple bagged in an ISO Class 7 cleanroom and gamma sterilised to no less than 25 kGy, suitable for efficient aseptic transfer into cleanrooms and isolator environments.

Features and Benefits

- ✓ 70/30 isopropyl alcohol (IPA) or denatured ethanol (DE)
- ✓ 0.2 micron filtered
- ✓ Closed system ensures sterility of contents
- ✓ Lightweight, ergonomic bottle design
- ✓ Long length trigger
- ✓ 0.9L and 0.45L[†] bottle sizes
- ✓ Individually double or triple bagged and gamma sterilised
